

# NEW Larger 1500ml Cartridges!!

## VALUE

Encore's 1500ml cartridges are manufactured for larger manual tie plugging jobs. The 1500ml cartridge can plug up to 85 holes, allowing operators to change cartridges less frequently and keep up production. 1500ml cartridges allow for more chemical in each case to reduce the number of cases needed which reduces freight costs as well.

## COMPOUND

Encore's high yielding compound is offered in three different size cartridges. Material has a one year shelf life when sealed and stored properly. Cartridge application spike hole yield: 12 holes per 200ml, 35 holes per 600ml, and 85 holes per **1500ml** spike holes. The 1500ml cartridge comes in a case of 6 for 510 holes per case.

## APPLICATOR

The 1500ml battery powered applicator make dispensing easy and fast. The 18v battery holds a charge for a full day's work. The sling on the applicator helps the operator hold the 19lb applicator and cartridge with ease.
